Single Soft Close

Double Soft Close

Installation

Single soft close application shown

Fix catch plate into track through slotted holes with 2 screws only

Insert clip stop & 1st hanger into track, then soft close. The soft close must be in primed position, as shown

Insert 2nd hanger & attach to soft close with cap screw. Install panel as per system instructions.

Fine adjustment

Adjust catch plate as required. Secure in final position with the 3rd screw

Care and Maintenance

Product

Soft close device

Function
Brio Soft close provide peace of mind and a sense of quality as the panel is aided to its rest position in a controlled manner.

Maintenance

Care
To ensure the product provides years of trouble free service a little maintenance maybe required. Periodically wipe down the rails of the track to remove unwanted build up of dust and dirt that may prevent the wheels rotating smoothly.

Adjustment
Over time there maybe a need to adjust the rest position of the soft close device.
